A WATCH-NOT A TOY! Any Jeweler Can Take it Apart and Put it

Up Again!

THE "TRENTON" is the best Watch, for the money, in the world. Jewelers and experts have been puzzled and astonished by its elegant appearance and perfect time-keeping qualities. It is the result of Yankee genius and years of labor combined. This watch is a marvel for accuracy and cheapness, and we can now, for the first time in the history of watchmaking, offer our subscribers a cheap Watch, which, as a timekeeper, is equal in all respects to the best made anywhere, and is superior to any other cheap watch. The "Trenton" has a jeweled balance, removable without taking off the top plate, is a stem wind and stem set, with back ratchet. It is a three-quarter plate, with quick train (18,000 beats per hour.) All the movements are carefully regulated and inspected before leaving the factory.

The "Diamond Silver Case," in which the works are placed, is the best combination of Silver and Nickel ever used. It is worth more than pure silver, and is better. They are solid, not plated, and will wear the same until worn through to the movement. The snap back will keep out the dust and dirt, and is a dust-proof case, thus avoiding the expense and bother of cleaning THE TRENTON is no experiment. It is an assured success, and pronounced so by all who have seen it. THE WATCH for the million.
